

Long Division Problems

Practice 4B: Chapter 5, pages 46-49

1,861 ÷ 19 is closest to: (circle one)

100 500 1,000 2,000

$$19 \overline{) 1,861} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

9,124 ÷ 18 is closest to: (circle one)

90 500 1,000 2,900

$$18 \overline{) 9,124} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

16,132 ÷ 51 is closest to: (circle one)

30 80 320 1,400

$$51 \overline{) 16,132} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

14,500 ÷ 63 is closest to: (circle one)

25 50 100 200

$$63 \overline{) 14,500} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

$1,895 \div 16$ is closest to: (circle one)

25 50 100 500

$$16 \overline{) 1,895}$$

quotient = _____

remainder = _____

$7,247 \div 35$ is closest to: (circle one)

20 200 800 1,500

$$35 \overline{) 7,247}$$

quotient = _____

remainder = _____

$62,482 \div 72$ is closest to: (circle one)

40 150 400 900

$$72 \overline{) 62,482}$$

quotient = _____

remainder = _____

$14,706 \div 12$ is closest to: (circle one)

500 1,200 3,000 5,000

$$12 \overline{) 14,706}$$

quotient = _____

remainder = _____

Long Division Problems

Practice 4B: Chapter 5, pages 46-49

1,082 ÷ 42 is closest to: (circle one)

25 80 150 500

$$42 \overline{) 1,082}$$

quotient = _____

remainder = _____

6,281 ÷ 61 is closest to: (circle one)

9 50 100 900

$$61 \overline{) 6,281}$$

quotient = _____

remainder = _____

20,891 ÷ 49 is closest to: (circle one)

50 200 400 900

$$49 \overline{) 20,891}$$

quotient = _____

remainder = _____

16,812 ÷ 73 is closest to: (circle one)

23 50 100 250

$$73 \overline{) 16,812}$$

quotient = _____

remainder = _____

Long Division Problems

Practice 4B: Chapter 5, pages 46-49

$6,712 \div 40$ is closest to: (circle one)

40 80 160 400

$$40 \overline{) 6,712}$$

quotient = _____

remainder = _____

$32,168 \div 22$ is closest to: (circle one)

15 150 500 1,500

$$22 \overline{) 3,216}$$

quotient = _____

remainder = _____

$51,256 \div 72$ is closest to: (circle one)

50 120 700 3,200

$$72 \overline{) 51,256}$$

quotient = _____

remainder = _____

$49,842 \div 46$ is closest to: (circle one)

100 300 1,000 3,100

$$46 \overline{) 49,842}$$

quotient = _____

remainder = _____

Long Division Problems

Practice 4B: Chapter 5, pages 46-49

$2,622 \div 81$ is closest to: (circle one)

30 90 150 500

$$81 \overline{) 2,622} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

$8,208 \div 52$ is closest to: (circle one)

20 90 160 900

$$52 \overline{) 8,208} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

$91,300 \div 97$ is closest to: (circle one)

100 900 2,500 5,000

$$97 \overline{) 91,300} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$

$29,048 \div 12$ is closest to: (circle one)

120 500 1,200 2,400

$$12 \overline{) 29,048} \quad \begin{array}{l} \text{quotient} = \underline{\hspace{2cm}} \\ \text{remainder} = \underline{\hspace{2cm}} \end{array}$$
